Caterpillar's D7E features a diesel engine that drives an electric generator connected to electric motors, technology that eliminates some mechanical parts, and reduces wear and tear. To learn more, turn to Page 9C.

Court dismisses labor agreement case

By CARLOS RICO
The Daily Transcript

In a decision that surprised some, a Superior Court judge ruled against the local Associated General Contractors chapter in a discrimination suit against the San Diego Unified School District.

Judge Judith Hayes dismissed the case that alleged the school district's Project Stabilization Agreement (PSA) was discriminatory, as it only allows

apprenticeship workers from union-only shops to be a part of the Proposition S construction projects.

"The decision was expected," said Stuart Markey, executive director of the Capital Improvement Bond Program for the San Diego Unified School District. "It underscored the legality of Project Stabilization Agreements, in general, as well as the effort that went into creating the

(labor agreement)."

The labor agreement, which went into effect Oct. 27, 2009, states any district construction project estimated at \$1 million or more that uses Proposition S funds will fall into this agreement.

The case, which was filed by the AGC, states the apprenticeship stipula-

S.D. agency helps those in need with weatherization

By **CARLOS RICO**
The Daily Transcript

For over 45 years, the Metropolitan Area Advisory Committee (MAAC) Project has helped low- to moderate-income families in various aspects, from youth programs and employment services, to affordable housing assistant and health services.

The nonprofit also aids people with home repairs and renovations through its Weatherization Program, which has been in place for more than 30 years.

"The programs that we have and provide to the community are to help stabilize them and make them self-sufficient," said Sandra Cordova, operations program manager for the MAAC Project's Healthy Homes and Health Services division.

The Weatherization Program, which falls under the Healthy Homes and Health Services umbrella, helps people who need repairs around their homes and, in most cases, cannot afford to do them on their own.

Monday through Friday, and one Saturday each month, six two-member crews leave a warehouse in National City around 8 a.m. with their

tools and materials to work an eight-to 10-hour day.

Each crew, consisting of full-time MAAC employees, has a schedule they get every morning, telling them what houses to go to and what exact repairs are needed.

"An assessor will go out to each home prior to our workers going out there and see what we can and cannot do," said Patty Bailey, director of Healthy Homes and Health Services.

Typically, the Weatherization Program covers minor home repairs like window replacement, new tankless water heaters, florescent light fixtures and exterior doors, to name a few.

The workers also educate homeowners on these sustainability features, so that they can properly save energy, water and money.

Each crew will work on an average of five homes a day, based on how much work each home needs.

It is a free service that the MAAC Project offers to residents whether they rent or own — who live south of state route 94 and into some East County communities.

"Our clients usually come by word

of mouth and we prioritize the people we help based on a first come, first serve basis," said Bailey, who added that they will tend to put seniors and people with disabilities toward the top of their lists.

To be eligible for these repairs, households have to fall into a certain financial category based on their yearly household income.

For instance, a family of one has to make less than \$29,791; a family of two can make up to \$38,957; a three-member family can make \$48,124; a four-member family less than \$57,291; a five-member family \$66,457; and a six-member family no more than \$75,624.

These figures are based on the state's Low Income Home Energy Assistance Program and are valid through the end of Dec. 31, 2010.

"Our goal is to help as many people as possible," Bailey said.

Last year, the Weatherization Program was able to repair over 2,000 homes. Funds for this program come from the state level, with federal funding also coming from President Barack Obama's stimulus package of 2009.

The Weatherization Program also allows for apprenticeships and on-the-job training.

Through the years, the MAAC Project has taken in qualified individuals that want to learn the trades of a carpenter and handyman so they can start their career as a contractor.

The MAAC Project currently has three workers that were once under the wings of the Weatherization Program crewmembers.

Also thanks to President Obama's stimulus package, the MAAC Project has been able to create a six-month training class for those that want to become certified in weatherization.

The MAAC Project as a whole offers over 15 programs and services that deal with helping out the community.

It has an annual budget of \$25 million with about \$13 million going to cover personnel's salaries.

It employees about 420 people with about half of them working in the Head Start Services division, which helps over 1,200 children and their families through various programs with federal dollars.

Contractors subject to new regulations in 2010

By **MONICA UNHOLD**
The Daily Transcript

As contractors rang in a year with hopes it will be better than the last, they also reluctantly welcomed new legislation for their hard-hit industry.

The most influential legislative measures include requirements for the inclusion of small and disabled veteran contractors on state funded projects and restrictions on water and air pollution.

ABX4 21 requires state agencies to award contracts to bidders who meet goals for participation by contractors who qualify as an Underutilized Disadvantaged Business Enterprise (UDBE) or Disabled Veteran Business Enterprise (DVBE).

The measure eliminates "good faith effort" requirements that previously allowed contractors to prove they had reached out to such contractors but were unable to include them in the project, said Brad Barnum, director of government affairs for the Associated General Contractors San Diego chapter.

The General Services Department set a goal of 3 percent participation by UDBE and DVBE contractors on bids.

The rule creates problems for contractors because such participation levels may not always be possible, said Dave Ackerman, AGC's Sacramento lobbyist.

If qualifying subcontractors do not submit on a particular project, the general contractor is unable to meet the quota and the bid will be considered unresponsive.

"You might as well throw your bid in the trash can because it will be considered unresponsive," Ackerman said.

The legislation has ultimately reduced participation of such contractors by an estimated 50 percent, Ackerman said.

In the coming legislative session, AGC plans to sponsor a bill that will restore the "good faith effort" rule, Ackerman said.

Though the AGC is leading the effort, the bill will be cosponsored by other construction trade organizations. AGC is also working with the DVBE community to obtain their support.

"They just want to make sure they get work," Ackerman said. "I hope we're able to pencil out an agreement next year."

SB 548 requires general contractors to enter into a separate contract with DVBE contractors to ensure payments are made. AB 31 also pertains to state contracts, and allows small businesses and DVBE businesses to be awarded contracts between \$100,000 and \$250,000 without complying with specific competitive bidding requirements.

Contractors are also apprehensive about new water quality legislation. Most contractors are not yet aware of the nuances of the highly complex legislation, however they may be subject to hefty fines if they unknowingly violate it, said Mike Shaw, president of the Engineering General Contractors Association of San Diego and President of El Cajon-based grading contractor, **Perry & Shaw**.

SB 310 and SB 790 will make it near-

ly impossible to do construction during the rainy season, Shaw said.

The other hot button regulatory issue for heavy construction contractors is the California Air Resources Board diesel emissions regulations, which are effective March 1.

Recession battered construction firms have already been forced to spend millions of dollars to retrofit and replace equipment in order to comply, Shaw said.

The combination of the economy and new regulations is also a topic of concern for the Building Industry Association of San Diego.

The organization continues to continue pushing state and local government to defer fees for building permits and extend homebuyer tax credits, said Matthew Adams, director of government affairs for BIA San Diego.

Last year the BIA worked with local government to secure building permit fee deferrals cities countywide. The group plans to continue working to secure the deferrals in other cities, such as Escondido, Adams said.

Other issues of importance to members of the construction industry include Project Labor Agreements. Local ballot

Local contractors working to revive San Diego Sockers

By CARLOS RICO
The Daily Transcript

Dave Pike, Phil Salvagio and Carl Savoia have known each other for quite some time. Pike and Salvagio are brothers-in-law and have been friends for the past 18 years, and Pike and Savoia are lifelong San Diegans who both went to Patrick Henry High School.

All three are co-owners of **Preferred Contractors Insurance Co.** as well as the businessmen leading the rebirth of the San Diego Sockers professional indoor soccer franchise.

"We are all here for each other and are helping one another succeed," said Savoia, head of marketing for Preferred Contractors Insurance, who added that all three had a hand in getting into the insurance business and sports franchise ownership.

Preferred Contractors Insurance is a general liability company that is run through a wholesales company that represents small independent contractors, larger general contractors and land developers.

The five-year-old company offers insurance premiums to its clients in case they get hurt on the job or if something is installed wrong and something goes wrong with that particular job, whether it is a roofer falling off the top of a house or faulty wiring that causes damage to a piece of property.

What's different about Preferred Contractors is that it conducts almost all its business via phone, e-mail and fax with hardly any face-to-face interaction.

"Our marketing approach has always been to hit the whole state with mailers (and) telemarketing ... it was just customary to collect the check in the mail, over the fax machine or over the phone," said Pike, chief operating officer of Preferred Contractors Insurance. "A lot of times our clients have known us for years, but we just haven't met face-to-face."

Salvagio, CEO of Preferred Contractors Insurance, said the "insurance market has changed a lot since the olden days" where before, an insurance broker could only see about five potential clients a day, whereas now insurance agents can talk with five clients in one hour.

Preferred Contractors also works with various small insurance companies from all over California and 20 other states to help cover contractors for whatever needs they have. For instance, a contractor may call Preferred and ask for certain coverage. Preferred will search from its pool of insurance partners and find the right provider for that contractor, whether

Photo: J. Kat Woronowicz

Phil Salvagio, CEO of Preferred Contractors (left), and Carl Savoia, head of marketing, are reviving the Sockers franchise. The lifelong San Diegans said they revamped the Sockers "for the love of the sport."

that contractor or those insurance partners are in the same state or not.

Salvagio said the company does this because it allows it to customize its clients' policies to their specific needs — since no two contractors are the same.

"We know the industry," said Salvagio. "We have all worked as brokers. We know what brokers want and need. We support them so that the contractor can get the best deal possible."

It was Savoia that first got Pike and Salvagio into insuring contractors after he had started his own successful insurance business more than 10 years ago.

"We liked it because, from an insurance perspective, the premiums were good and because there is always a need for (insurance) even in a down construction economy with remodeling and services," said Pike.

All three have some background in construction and all three have had their own construction insurance company before.

Salvagio said the construction insurance market is a \$100 billion per year industry, of which Preferred Contractors brings in about \$12 million annually. Salvagio added that the company is growing in all areas, from revenue, clients and employees.

"We are doing very well," he said. "We

are probably the only insurance company in our industry that is actually growing in the last five years ... our least amount of growth was 10 percent."

In the last few years, all three owners said that the contractors' insurance landscape is changing.

There are more insurance companies for contractors, which Salvagio said works in the contractors' favor, since now they can get at least four quotes whereas six years ago contractors could only get one or two quotes, and in essence, a better price for coverage.

Salvagio said in the last 12 months there has been a steady decrease in the number of clients the company insures, since contracting insurance companies work parallel to the construction industry.

"It hurts us too because we follow that (market)," said Salvagio a few weeks ago.

It's only been in the last month or so, Salvagio mentions, that the company is starting to see an increase in clients, but they are asking for smaller policies.

"A guy used to make \$500,000 is now at \$100,000 and a guy that was making \$1 million is now at \$300,000 ... so now the policy is smaller and we don't get as much commission, but we still have to pay the same amount of money to our employees."

Another changing dynamic in the industry is policy cancellation. Salvagio said now contractors are canceling their policies once a particular job is complete, and are not being insured for the whole year.

"Our cancellation rate went from 8 percent from a year ago to close to 30 percent this year," he said. "The biggest complaint you get is, 'I can't afford this policy anymore.'"

The CEO also said Preferred is now finding itself chasing down the money owned by contractors, where in years past that wasn't the case.

Now 2009 has also brought out a passion the trio has had for years. About a year ago, Pike, CEO; Salvagio, head coach; and Savoia, COO; revamped the Sockers professional indoor soccer franchise and brought it back to life.

"We bought it for the love of the sport," said Salvagio, who initially brought the idea to buy the Sockers to Pike and Savoia.

"We are all here to support each other," said Savoia. "So when one has an idea to get involved with something and it makes sense, then we go for it."

The three friends work as a roundtable to put the Sockers back on the map and to make it as popular as it was

INVITATION TO BID JANUARY 11, 2010

LITTLE ITALY PUBLIC IMPROVEMENT PROJECT

BID NO. K105029RDA

BID OPENING: THURSDAY, FEBRUARY 18, 2010 @ 2:00 P.M.

On behalf of the Redevelopment Agency of the City of San Diego ("Agency"), Centre City Development Corporation (CCDC), an equal opportunity contracting entity, is requesting bids from "A" General Engineering Contractors for Little Italy Public Improvements including the removal and replacement of sidewalks, driveways, curb and gutters, pedestrian ramps, preservation of historic sidewalk stamps, installation of street trees and miscellaneous associated items of work in the Little Italy expansion area of downtown San Diego. The probable engineering estimated construction cost is \$1,020,543. This is a State of California Prevailing Wage project with subcontracting and vendor opportunities for public works and laborers, equipment operators, hoisting, trucking, traffic control and concrete material suppliers/vendors.

Bids are strongly encouraged from small businesses, disabled veteran-owned businesses, women-owned businesses, firms owned by under-represented ethnic groups and local firms. This project will utilize the City of San Diego's Subcontracting Outreach Program (SCOPe).

Bid packages can be downloaded from the City of San Diego's Engineering & Capital Projects Department website at:

<http://www.sandiego.gov/engineering-cip/services/consultcontract/advertising.shtml> or, can also be viewed at the San Diego Contracting Opportunities Center (SDCOC), 4007 Camino del Rio South, Suite 210, San Diego, CA, 92108 (619-285-7020), or at CCDC plan review room at 401 B Street, Suite 400, San Diego, CA 92101 (619-235-2200).

Primes and subcontractors are encouraged to attend the "Pre-Bid" meeting on Thursday, January 21, 2010 from 9:00-10:30 a.m. in the Board Room, 401 B Street, Suite 400, San Diego, CA 92101 (619-533-7100).

Bids are due by 2:00 p.m. on Thursday, February 18, 2010 to the City of San Diego's Purchasing & Contracts Department, 1200 Third Avenue, Suite 200, San Diego, CA 92101. All questions must be submitted in writing directly to Project Manager (PM) John L. Anderson via e-mail at anderson@ccdc.com, or via fax at 619-236-9148. Contractors shall contact the PM by phone to inform of any written question, request for information, etc., prior to sending any email or fax err (619) 533-7140.

NOTE:

There may be Addendum/Addenda issued related to this Invitation to Bid.
Interested bidders are required to monitor The City of San Diego's website at
<http://www.sandiego.gov/engineering-cip/services/consultcontract/advertising.shtml>
to track Addenda.

Caterpillar ships new fuel-saving, diesel-electric bulldozer

By WILL DALEY
Bloomberg News

Caterpillar Inc., the world's largest maker of construction equipment, began shipping a diesel-electric bulldozer today that it says can push more dirt using less fuel.

Caterpillar (NYSE: CAT) now must convince buyers the technology in the \$600,000 D7E machine is both dependable and worth the 20 percent higher price.

"In a price-sensitive market, it will make them think twice, but you could say the same thing with the Prius," said Eric C. Orlemann, author of several books on heavy machinery, referring to **Toyota Motor Corp.**'s (NYSE: TM) hybrid car. "You are paying for that technology."

The D7E and other new equipment, such as **Komatsu Ltd.**'s hybrid excavator, are part of an industry movement to save customers fuel costs with technically advanced machines.

The D7E's diesel engine drives an electric generator that is connected to electric motors, technology that eliminates some mechanical parts and reduces wear and tear, the Peoria, Ill.-based company said. The tractor is as much as 30 percent more fuel efficient than the previous all-diesel model.

"What we've done is replace the

mechanical transmission and torque convertor with an electric generator and electric motors," David Nicoll, the D7E commercial manager, said in an interview. Customers can recoup the 20 percent price premium in two and a half years, he said.

Dozer's introduction

The introduction of the dozer, which took a decade to develop, comes as customers recover from the worst recession since World War II.

"If anybody could have had a crystal ball to predict how hard the world would change just in 12 or 14 or 16 months, I would imagine there would have been a different timing of the release," said Darrin Drollinger, a vice president at the Association of Equipment Manufacturers.

The acceptance of a new technology in the construction-equipment market may be similar to how auto buyers warmed up to hybrid cars, said Jeff Windau, a St. Louis-based analyst at Edward Jones & Co.

"It took 10 years for them to get several percentage points of market penetration," Windau said. "It takes time, especially with new technology, for people to adopt it and to expand into the broader stream of the market."

TSA Contracting finishes new wine bar and lounge

Daily Transcript staff report

TSA Contracting Inc. has just completed construction of a new wine establishment in downtown's East Village.

Toast Enoteca e Cucina is a 1,600-square-foot wine tasting lounge located near PETCO Park at 927 J St.

Patrons will be able to sample a diverse selection of wines from around the world using self-dispensing Enomatic machines. The restaurant offers seating at the bar, booths adjacent to the bar and a patio area.

Martin Gonzalez owns the establishment, which is his second restaurant venture in downtown San Diego. His first is Acqua Al 2, an authentic Tuscan restaurant that has been opened since 2000.

TSA Contracting's project team included Vince Gonzales, project manager; Greg Fall, assistant project manager; John Batis, superintendent; and Scarlet Karwel, senior project coordinator.

Designworks Architecture and **Winer Art** designed the facility. **Towne Construction**, **Helix Mechanical** and **Empire Electric** were a few of the subcontractors that worked on this project.

Regulations

Continued from Page 2C

measures related to PLAs will likely be on the November ballot.

Local cities may also enact DVBE and UDBE quotas for their contracting purposes that mirror state legislation, Shaw said.

Workers' compensation requirements are also ramping up, Shaw said. A package of bills passed in 2009 increases the penalty for an employer not carrying workers' compensation insurance to \$1,000 to \$1,500 per employee, further defines what types of incidents are eligible and ensures employers are responsible to compensate authorized medical treatment. AB 483 also requires insured organizations confirm their status with an online licensed rating organization.

Contractors will be fined up to \$10,000 and receive up to six months in county jail for operating without a license as a result of AB 370.

Though many contractors see the majority of state legislation as unfavorable, federal legislation will give small contractors a leg up.

"The senate has introduced a bill to raise the cap on small business loans to \$5 million," said Scott Crosby, president of the Associated Builders and Contractors San Diego Chapter in a written statement. "This is a positive for the construction industry, especially ABC members, most of whom are small businesses."

IVHA Office Building Brawley

Submit bids to Imperial Valley Housing Authority. Coup & Smith Architects (619) 226-6823 Email: IVHAOffice@CoupSmith.com. Estimate: N/A .

Bid Deadline January 19, 11 am

Transcript Plan No. 25

Work Involves: IVHA Office Building: Without force or effect on the actual project scope, the work is described as consisting generally of the construction of a new one story office building on a vacant site. The building has a total floor area of approximately 16,500 SF. Construction is concrete slab on grade, steel and wood frame walls and steel and wood frame roof construction. The roofs are covered with built-up roofing. The typical exterior finishes are metal panels and stucco plaster, and typical interior finishes are drywall and ceramic tile. The building is air conditioned, and has typical plumbing and electrical systems. The work includes site development, including concrete paving, asphalt paving, landscaping, & carport shade structures. Complete information regarding ordering plans & specs may be found at www.CoupSmith.com.

Work Involves: Pauley Pavilion Renovation & Expansion: This Project will renovate and expand the Pauley Pavilion, a multi-purpose arena constructed in 1965. The Project consists of new construction and renovation, and upgrade of the UC seismic rating of the structure from Fair to Good. New construction shall consist of a two-story subterranean addition at the north side of the building, and an enclosed entry concourse on the north, east, west and south sides of the building. The subterranean addition shall accommodate modern locker rooms and team support facilities on the lower level, and a multi-purpose meeting facility seating 300 people on the upper level. The entry concourse shall accommodate a new main lobby and ticket office, and provide improved access to public restrooms, concessions and arena seating. The renovation scope of work shall include upgrades and replacement of major equipment and distribution components of Pauley's mechanical, electrical and plumbing systems; provision of building lighting, equipment and environmental control systems; provision of life safety systems including new fire alarm and fire sprinkler systems, a smoke evacuation system, emergency generator, and fire command center; code-required structural upgrades for assembly occupancies; hazardous materials abatement; landscape and paving improvements; restroom and concession improvements; new seating and sports flooring. . Mandatory Pre-Bid Conf. & Job Walk held Dec. 16, 8:30am, UCLA Campus. Plans/Specs available for purchase from Ford Graphics, 2435 Military Ave., Los Angeles, CA 90064, (310) 477-6501 <http://socal.fordgraphics.com/>.

Lennar leads builders higher on unexpected profit

By JOHN GITTELSOHN
Bloomberg News

Lennar Corp. climbed the most in six months last week, leading a rally in U.S. homebuilders, after reporting an unexpected quarterly profit because of a tax change in the way it accounts for land sales.

Lennar (NYSE: LEN) rose to \$15.95 Friday, after gaining \$2.14 Thursday, the most since June 25. The Standard & Poor's Supercomposite Homebuilding Index of 12 home construction companies jumped as much as 6.2 percent, the most since November.

KB Home, M/I Homes Inc., Toll Brothers Inc. and D.R. Horton Inc. all gained.

Lennar had a \$285 million operating loss before recording a \$320 million tax gain from a change in U.S. law allowing builders to carry back losses for five years.

Thursday's results broke a streak of 10 quarterly losses for Lennar. Like much of the U.S. homebuilding industry, the company is struggling to sell houses at a profit while competing with foreclosures and other distressed real estate.

The profit was "all from tax gains, not

from operations," said Jim Wilson, an analyst with **JMP Securities LLC** in San Francisco. Wilson rates the shares "market outperform."

Lennar's net income for the three months ended Nov. 30 was \$35.6 million, or 19 cents a share, compared with a net loss of \$811 million, or \$5.12, a year earlier, the Miami-based company said in a statement Thursday.

Investment writedowns

With the tax refund, Lennar can accelerate a move away from generating cash through investment writedowns, Chief Executive Officer Stuart Miller said in a conference call with investors.

"We probably moved forward impairments we might've seen in the future," he said. "I think we're back to a normalized business situation. We can start adding communities and start adding jobs."

Costs dropped to \$1.06 billion in the fourth quarter from \$1.31 billion a year earlier. Revenue fell 29 percent to \$913.7 million.

The average price of a home completed in the quarter was \$238,000, down 9 percent from the same period in

2008.

President Barack Obama sought to boost home sales by extending a government tax credit for some buyers.

The Federal Reserve is also supporting the housing market by purchasing bonds backed by home loans, a program that pushed the 30-year fixed mortgage rate to a record low of 4.71 percent in December.

'Limited momentum'

Lennar's outlook remains mixed, Anna Torma, an analyst with **Soleil Securities Corp.** in New York, said Thursday.

"We expect orders to continue to increase, aided by the tax credit and recovering housing markets," she wrote in an e-mail. "However, we continue to believe that pricing will remain under pressure in the near-term and see limited momentum in our forecast due to the headwinds still expected in the existing home market."

Lennar's markets include parts of Nevada, Florida, California and Arizona, states with the highest foreclosure rates, according to **RealtyTrac Inc.**

The Mortgage Bankers Association reported that 14.4 percent of U.S. home

mortgages were delinquent or in the foreclosure pipeline for the quarter ended Sept. 30, a record since the Washington-based group began its survey in 1972.

"If you ask most homebuilders what their No. 1 competitor is, they won't tell you another builder," said Megan McGrath, a housing analyst with Barclays Capital Inc. in New York. "They'll say the foreclosure market."

Prices drop

New U.S. home sales fell to an annual pace of 355,000 in November, down from a pace of 400,000 in October, the Commerce Department reported Dec. 23. The median new home price dropped to \$217,400 in November from \$221,600 a year earlier.

D.R. Horton (NYSE: DHI), the second-largest U.S. homebuilder, reported a net loss of \$231.9 million, or 73 cents a share, on Nov. 20, missing analysts' estimates.

Toll Brothers (NYSE: TOL) the biggest U.S. luxury-home builder, reported a wider-than-expected fourth-quarter loss on Dec. 3 of 68 cents a share as revenue fell faster than costs.

Consumption of off-road diesel fuel declines significantly

By MONICA UNHOLD
The Daily Transcript

Data on consumption of off-road diesel fuel in California dropped on a month-over-month basis throughout 2009 and has declined year-over year since 2004, according to government data.

The construction industry has kept careful watch of the commodity since the California Air Resources Board enacted diesel emissions regulations that apply to nearly 1 million trucks, buses and pieces of construction equipment, effective March 1.

According to raw data gathered by the California Board of Equalization, consumption of off-road diesel fuel in California declined each month during the first six months of 2009, with the exception of January. However, the data is unverified and not audited like data the agency collects on other commodities that are taxed, BOE spokeswoman Anita Gore cautioned.

In the United States, diesel intended for consumption by off-road vehicles is exempt from the road taxes levied on fuel for on-road vehicles. In order to ensure the fuel is not used in on-road vehicles, it is dyed red. The fuel is commonly used in off-road construction equipment, agricultural equipment and

diesel generators.

In June 2009 — the most recent data available — more than 63 million gallons of red dye diesel were consumed in California, compared with more than 66 million gallons in June of 2008. The BOE data shows consistent month-over-month declines.

Consumption of red dye diesel in California peaked at nearly 852 million gallons in 2006, falling to more than 761 million gallons in 2007, the BOE data shows.

The U.S. Energy Information Administration, which keeps more detailed data, however reports off-highway diesel fuel consumption in California reached its peak of nearly 190 million gallons in 2004, falling to 110 million gallons in 2008. Consumption by construction equipment totaled 179.5 million gallons in 2004 and 107 million gallons in 2008.

Nationwide, red dye fuel consumption by the construction industry peaked at more than 2.2 billion gallons in 2005, and dropped to more than 1.9 billion gallons in 2008, according to the EIA.

The data is important because it shows a verifiable decline in diesel fuel consumption by the construction industry, said Mike Kennedy, general counsel for the national chapter of the

Associated General Contractors of America.

The construction industry believes a reduction in economic activity has already contributed to a significant reduction in emissions.

Red dye diesel fuel was not considered in the model used by CARB to estimate emissions by the construction industry.

"I do not believe red dye diesel fuel is a good measure," said Les Simonson, manager of CARB's heavy-duty diesel enforcement program.

The measure does not take into account other means of off-road diesel consumption that are not subject to the CARB rule, Simonson said.

CARB's model uses an array of information such as number of pieces of off-road equipment, hours of operation, hours of operation at peak horsepower among others to estimate diesel fuel consumption and thus emissions outputs, Kennedy said.

The estimates put forth by CARB's model should at the least be compared with red dye diesel consumption data in order to verify its accuracy, Kennedy said.

In early December, AGC conducted its own study and concluded the regulations are not necessary to achieve federal emissions targets until 2012

because reduced economic activity has already reduced emissions far below the standards CARB set out to meet.

AGC conducted the study by plugging the most recent data on construction activity into CARB's existing model. However the model itself may be flawed, Kennedy said.

"What we've seen does suggest that indeed, there are some problems with the model," Kennedy said.

One such problem is that the data attributes all off-road diesel emissions to the industries affected by CARB's off-road rule, including construction, mining and airport equipment. However, other industries also consume off-road diesel fuel, Kennedy said.

Members of the construction industry believe CARB is overestimating its diesel emissions by between 50 percent and 70 percent, said Tom Brown, president of Vista-based grading contractor, **Sierra Pacific West**.

AGC plans to continue pushing for CARB to reconsider the regulations, before they become effective March 1, Kennedy said. Making the required retrofits and upgrades will cost contractors millions.

Rancho Santa Fe Rd. Fiber Optic Interconnect San Marcos

Bid Deadline

January 26, 2 pm

Submit bids to City of San Marcos. CIP 321. Mike Rafael, Associate Civil Engineer, Email: mr@san-marcos.net. Estimate: \$300,000.

Transcript Plan No. 49

Work Involves: Rancho Santa Fe Rd. Fiber Optic Interconnect: The work generally consists of installing 5,300 lineal feet of fiber optic traffic signal interconnect system via directional boring & additional closed captioned cameras (CCTV) along the northern end of Rancho Santa Fe Rd. to provide traffic surveillance and signal timing coordination along this corridor. In addition, the project includes work within the Caltrans right-of-way which consists of installation of fiber optic cable within the existing Hwy. 78 overcrossing, relocating the existing westbound ramp traffic signal cabinet to the north side of the interchange & installing new conduit & conductors for the westbound ramp signals. Plans/Specs (NR) \$20 (mailing \$10) may be obtained by contacting Lupita Hall, Engineering Div. Secretary, Email: lhall@san-marcos.net (760) 744-1050 x3229.

SOQ San Pasqual Academy Res. Reconst. Design San Diego

Submit proposals to County of San Diego. RFSQ 4223. PCO, Rian Risley, rian.risley@sdcounty.ca.gov. Estimate: See Description.

Proposal Deadline
January 12, 4 pm

Plans Available at <http://plans.sddt.com>

Work Involves: Statements of Qualification for the San Pasqual Academy Residences Reconstruction Design-Build Project: RFSQ responses will be reviewed and ranked by a selection committee and the top three Design-Build Entities will be invited to respond to the Request for Proposal (RFP) for the Design-Build Project. The two non-selected Design-Build Teams will be given a proposal development stipend to partially offset the cost of submitting for the RFP. The General Contractor shall possess, at the time of submitting the bid, a California contractor's license, Classification B, General Contractor. The project consists of designing and constructing approximately 14 new residential LEED Silver-certified residential buildings/rooftops and a minimum of 30 residential units totaling approximately 26,000 square feet. The design and construction of the project shall be completed within a Guaranteed Maximum Price (GMP) of \$4,500,000 for the residential units and \$2,000,000 for code improvements, roads and infrastructure. The County has also set aside an additional \$1,000,000 for construction of a new administration center building. This set aside will be available should any of the Design-Build Teams elect to include a new 7,000 square foot Administration Center as part of the GMP provided all project requirements are met or exceeded by the construction of the residential units. The revised GMP for projects including an Administration Center is \$5,500,000 for residences and Administration Center and \$2,000,000 for the code improvements, roads and infrastructure

. Mandatory Pre-Bid Conf. to be held on Nov. 25, 10am, Office of Purch. & Cont., 10089 Willow Creek Rd., Ste. 150, San Diego, CA 92131. Bid Pkg. Available for download from County of San Diego's Buynet Website: <http://buynet.sdcounty.ca.gov/main.asp>.

Barnhart president finds opportunity in military, education construction

By MONICA UNHOLD
The Daily Transcript

Barnhart Inc.'s management strategy positions the company to weather even the most tempestuous economy. Over the years, the company has ensured it is well diversified and kept its staff lean even during boom years — moves that have been the key to success for the company, said Eric Stenman, Barnhart president.

While many construction businesses have cut staff by as much as 50 percent, Barnhart is hiring. The company's volume for 2009 is approximately \$400 million, down just \$100 million from 2007, which was the best year on record at \$500 million.

An increase in military projects is a major factor in the company's success, Stenman said. In 2009, military work accounted for \$140 million of the com-

pany's volume, compared with \$90 million in 2008 and \$20 million in 2007. Stenman expects Barnhart to continue acquiring more U.S. Navy projects through its existing multiple award contracts.

Another large market for the company is educational work. Seventy-five percent of Barnhart's volume next year, an estimated \$300 million, will be in education projects.

During his time at Barnhart, Stenman has worked on hundreds of projects. His favorites are the ones that create lasting benefit for communities, such as Petco Park and UCSD Supercomputer Center, Stenman said. His favorite contract was for construction of the Ronald McDonald House, which houses families while their sick

Chula Vista OKs grants for solar energy systems

Daily Transcript staff report

Chula Vista's city facilities will soon run on more solar power.

On Tuesday, the Chula Vista City Council approved using nearly \$2 million in federal Energy Efficiency Conservation Block Grants to expand onsite photovoltaic solar energy systems.

The funds will put local contractors to work while reducing the city's dependence on fossil fuels.

"Local electricians and apprentices

will go to work immediately on the solar projects while the city develops more career opportunities in renewable energy generation and energy efficiency projects," said Nick Segura, an electrician and president of the International Brotherhood of Electrical Workers Local 569 in a statement. "The city is using stimulus money as a short-term fix in bad economic times, while also creating long-term local careers that protect the

health of our communities and help the city prosper."

Last spring, the city put out a call for proposals for the municipal solar projects. The request emphasized the city's desire to do business with contractors that employ a local electrical work force committed to safety and quality while partnering with local higher education facilities.

Local electrical contractors and apprentices will work on the municipi-

pal solar projects.

"It is a tough time for young Chula Vistans to make ends meet," said Rafael Arredondo, a Southern Contracting employee and Chula Vista resident in a statement. "Making sure that jobs are sustainable for residents like me balances the short term needs of Chula Vistans to have 'any job' with our long-term goals of having sustainable careers."

Barnhart

Continued from Page 25C

or injured children receive treatment at Rady Children's Hospital.

Barnhart completed the project at cost with donated materials and labor from subcontractors. The San Diego chapters of both the Associated Builders and Contractors and Associated General Contractors of America presented Barnhart with awards for construction of the project.

"You don't have to take a job where you make a big profit," Stenman said. "You take these jobs you believe in and the accolades follow naturally."

Looking down the road, Stenman is excited about the new opportunities available to Barnhart as a part of Heery International. The Balfour Beatty subsidiary acquired Barnhart more than a year ago.

The company still operates as a local contractor, yet is able to pursue larger projects with the backing of the large conglomerate. Headquartered in San Diego, Barnhart currently has 322 employees statewide. The company plans to eventually expand to serve the entire Western United States, Stenman said.

"Having an ocean liner like Balfour Beatty behind you makes that possible," Stenman said.

Being a part of an international corporation also lends Stenman a broader perspective. Though many lament California's hard-hit construction industry, the market is actually outpacing other regions of the world, Stenman said.

With that in mind, Stenman sees a wealth of opportunities for Barnhart in the near future. He is focused on retaining employees by keeping in contact with them as well as clients. Due to the company's lean structure, each member of the team plays an integral part in its success, Stenman said.

"Everybody has their hand on the steering wheel," Stenman said.

Labor

Continued from Page 1C

tion in the PSA does not "circumvent legislative authority" since it is consistent with the labor code.

The court order said, "The district acted in its proprietary interests in adopting the PSA. The PSA is specific to the Proposition S projects and does not discriminate against nonunion contractors."

"We think the judge got it wrong," said Jim Ryan, executive vice president of the Associated General Contractors San Diego Chapter. "We feel (the PSA) does discriminate against nonunion apprentices."

The PSA contract was backed by union contractors and was put together by the San Diego Building and Construction Trade Council.

Tom Lemmon, business manager of the San Diego Building and Construction Trade Council, said the court's decision allows the district to proceed with building projects that will provide solid employment for local residents.

"We need to create good jobs in our local communities," said Lemmon, in a statement. "We don't want contractors that hire low-paid workers from out-of-town to be able to outbid responsible companies that provide career opportunities for hard-working San Diegans."

Xavier Leonard, spokesperson for the Center on Policy Initiatives, echoed these remarks and added that the school district knows the importance the labor agreement has on putting unemployed contractors back to work and provides local residents apprenticeship jobs.

"The PSA is the only way they can ensure the district's investment in construction projects," Leonard said.

The AGC is looking to overturn the judge's decision, and has filed an appeal.

"A three-judge panel will be looking into the case and we are confident that they will find that the (PSA) does discriminate," Ryan said.

He said he believes it will take about six months for the entire appeal process to unfold.

Since Proposition S was passed in November 2008, 18 construction con-

Sockers

Continued from Page 3C

in the late 1980s and early '90s.

Pike said the team is losing money right now because it doesn't have enough corporate sponsors. But he believes that once the economy improves that the Sockers will be profitable.

"We are getting some really good (crowds)," said Pike. "We know this is just the beginning and we understand that we have some growing pains, but we are excited about what

this can become."

The season is currently ongoing, and the team plays all its home games at the newly remodeled Del Mar Fairgrounds Arena, which has a roof (in case of rain) with openings for fresh air at the corners.

"Owning a San Diego team is special," said Salvagio, who played for the franchise in the 1990s.

carlos.rico@sddt.com

tracts have been awarded, totaling \$64 million in renovations to old school buildings and construction of new ones, according to Markey.

"In contrast, the district only awarded \$7 million in construction contracts during the first year of implementing the previous bond program," Markey added.

Since the PSA went into effect, no projects have either been advertised to bid or awarded.

National City receives \$1 million for brownfield fund

Daily Transcript staff report

National City has been awarded \$1 million to fund hazardous material cleanup projects on commercial and industrial properties.

The grant from the U.S. Environmental Protection Agency will be used to establish a Brownfield Revolving Loan Fund administered by the city's Redevelopment Division.

The funds are available as loans to

property owners who wish to clean up hazardous materials and petroleum.

Demolition or abatement of lead and asbestos are also eligible.

The loans can assist with cash flow for property owners who already have remediation plans under review or approved by the city, county or state government. There is no minimum amount and loans can be as large as the current fund balance, which is

\$800,000 for hazardous materials cleanup and \$200,000 for petroleum.

Nonprofits may apply for sub-grants from the city if they are property owners of eligible sites.

Successful applicants cannot be responsible for the contamination.

"The Brownfield Revolving Loan Fund is a useful tool for eligible property owners," said Patricia Beard, the city's redevelopment manager in a

statement. "Loans can be custom-tailored to assist cash flows for projects. Extremely attractive interest rates can be offered, with incentives for early repayment. The program objective is for loans to be repaid within less than five years."

National City's City Council will approve the loans. For additional information or to apply, call (619) 336-4250.
